

PV:1525

Handheld 1500 V 25 A
PV Test Instrument

The PV:1525 is designed for installers and O&M engineers to allow electrical safety testing and performance measures in PV systems up to 1500 V_{DC} and 25 A_{DC}, which is ideal for residential and commercial level installations.

The PV:1525 performs ground continuity, insulation resistance, open circuit voltage, and short circuit current tests.

With a new innovative user interface, the PV:1525 retains the ease of use from the previous generation while adding

additional features fit for a modern test instrument. Results can be tagged with information relating to the installation for ease of data management.

With Bluetooth® capabilities, test results can easily be transferred to a mobile app, PV:Sync Mobile (available for iOS and Android™), for review and exported for further sync with SolarCert software. Over-the-Air updates via the app ensure your instrument is always up to date with the latest features.

Key Measurement Features:

- PV string open circuit voltage measurement up to 1500 V_{DC}
- PV string short circuit current up to 25 A_{DC}
- Insulation resistance voltage up to 1500 V_{DC}

Together, we're making our world a safer place.
Every. Single. Day.
