

KMP 3050DL

A high performance insulation/continuity tester offering three levels of insulation test voltage and user friendly features including an easy to read bar graph display, giving clear indication that the insulation under test is being stressed to the requirements of the Regulations, continuous operation feature, and test lead Auto-Null facility.

KMP 3010DL

An easy to use insulation/continuity tester, the **KMP 3010DL** features a 500V DC insulation test voltage, time saving continuous operation facility and the ability to safely discharge capacitive circuits following testing.

KMP 3000 Series Comparator	3075DL	3050DL	3010DL
250V DC insulation test voltage	●	●	
500V DC insulation test voltage	●	●	●
1000V DC insulation test voltage		●	
Trac-Lok for extended battery life	●		
Lock-down test button for continuous operation	●	●	●
Test lead resistance zero adjustment	●	●	
Live Circuit warning	●		●
Protects against accidental connection to live circuit	●	●	●
Illuminated scale	●		
Automatic capacitive circuit discharge facility	●	●	●
Bar Graph	●	●	
Insulation / Continuity test currents to BS 7671	●	●	●

KMP 3000 Series Accessories

Included with all models:
 SL20 Snap-Lok Test Leads,
 Test Lead Pouch, Built-in Carrying Case,
 Batteries, Instruction Manual,
 Certificate of Conformity.

Optional

Snap-Lok Fused Test Leads upgrade,
 Certificate of Calibration.
